

TipCryp (\$TCM)

Creator Finance Infrastructure For The Digital Economy

Unlike speculative token launches, the \$TCM ecosystem already includes a working content creator tipping framework designed to modernize digital creator monetization through blockchain technology and decentralized financial ownership.

01 Executive Summary

TipCryp introduces a modern creator-focused ecosystem that combines cryptocurrency tipping, creator memberships, decentralized wallet ownership, and future staking infrastructure into a unified blockchain-powered financial platform.

The creator economy continues growing across livestreaming, video content, gaming, podcasts, and digital entertainment. At the same time, global finance is rapidly transitioning toward blockchain and decentralized digital asset systems.

The \$TCM ecosystem was designed to bridge these industries by allowing users to support creators while maintaining ownership and long-term utility of their digital assets.

02 The Problem

Modern creators face several financial limitations inside traditional platforms including high platform fees, payout delays, frozen balances, payment restrictions, and lack of ownership over generated revenue.

Most creator donation systems are fully centralized, meaning creators and supporters remain dependent on third-party financial infrastructure that controls transactions, timing, and accessibility.

Supporters also receive no long-term participation or ownership within the ecosystems they financially contribute to.

High Platform Fees

Up to 30–50% cut on creator revenue

Payout Delays

30–60 day holds are industry standard

No Ownership

Supporters receive zero asset ownership

03 The Solution

TipCryp provides creators and supporters with a decentralized financial ecosystem where cryptocurrency tips and memberships become fully user-controlled digital assets. This creates a creator economy infrastructure built around ownership, accessibility, and blockchain utility.

- ▶ Send direct crypto tips instantly to any wallet
- ▶ Maintain full wallet ownership at all times
- ▶ Transfer assets into USD when needed
- ▶ Trade for other cryptocurrencies freely
- ▶ Participate in future staking systems
- ▶ Avoid all traditional payout restrictions

04 \$TCM Token Utility

\$TCM functions as the core utility token powering the TipCryp ecosystem. It is the primary medium of exchange, governance, and incentive distribution across all platform functions.

Creator Tipping

Direct wallet-to-wallet tips

Memberships

Creator subscription access

Ecosystem Rewards

Participation incentives

Staking

Earn APY on held tokens

Governance

Future protocol voting

Integrations

Platform partnerships

05 Tokenomics

TOTAL FIXED SUPPLY

1,000,000,000 TCM

ALLOCATION	%	TOKENS
100,000,000 TCM excluded from circulation prior to the January 1, 2027 TGE. This results in an effective maximum supply of 900,000,000 TCM at launch, defining a fixed and reduced supply structure for the TipCryp ecosystem.		
Public Presale + ICO see breakdown below	10%	100,000,000
Staking Rewards	11%	110,000,000
Liquidity & Exchange Reserves	15%	150,000,000
Ecosystem Development	10%	100,000,000
Creator Growth Fund	7.5%	75,000,000
Marketing & Partnerships	5%	50,000,000
Team & Advisors LOCKED	5%	50,000,000
Community Treasury & Reserve DAO GOVERNED	19%	190,000,000
Total	100%	1,000,000,000

PUBLIC / ICO ALLOCATION — FULL BREAKDOWN (100M TOKENS)

Presale Stages 1–4 (sold)	100,000,000
DEX Liquidity Pool (locked 24mo)	100,000,000
CEX Exchange Reserve (escrowed)	50,000,000
Total Public Sold (ICO)	100,000,000 ✓

COMMUNITY TREASURY — DAO GOVERNANCE STRUCTURE (190M TOKENS)

Phase 1 — Now → Mainnet

3-of-5 multisig wallet. 2 founders + 1 legal entity + 2 community advisors. No single party can move funds.

Phase 2 — Mainnet Launch

On-chain DAO activates. 1% supply to propose, 10% quorum to pass, 48hr voting window.

Phase 3 — 10k Holders

Full decentralisation. Founders' voting weight capped at 15% regardless of holdings.

△ Multisig wallet addresses and DAO contract published on the Security page prior to mainnet. Independently verifiable on-chain.

06 Presale & ICO Structure

The TipCryp presale and ICO structure was designed to support ecosystem expansion, creator onboarding, liquidity provisioning, infrastructure development, and long-term platform scalability. The total funding goal across all stages is **\$1.65 Million**.

STAGE 1 – SEED

\$0.005

per \$TCM

Tokens	15,000,000
Raise	\$75,000

STAGE 2

\$0.010

Closes Sep 1, 2026

Tokens	20,000,000
Raise	\$200,000

STAGE 3

\$0.015

Closes Oct 31, 2026

Tokens	25,000,000
Raise	\$375,000

PUBLIC ICO

\$0.025

Tokens	40,000,000
Raise	\$1,000,000

TOTAL FUNDING GOAL

\$1,650,000

TGE

January 1, 2027

Minimum Purchase

\$25

07 Staking Infrastructure

A staking infrastructure is currently in development with a projected APY of approximately **5.8%**. The staking system is designed to create sustainable long-term incentives for holders while reducing circulating sell pressure.

5.8% Staking Pool
150,000,000 \$TCM allocated
Projected APY Long-term holder rewards

- ▶ Reward long-term holders with passive yield
- ▶ Encourage ecosystem stability over time
- ▶ Reduce circulating sell pressure post-launch
- ▶ Strengthen ecosystem participation incentives

08 Creator Economy Opportunity

Millions of digital creators now operate across livestreaming, video content, podcasts, gaming, and online entertainment platforms. As blockchain technology and decentralized finance continue expanding globally, creator-focused financial ecosystems represent a major long-term growth opportunity.

TipCryp aims to position itself at the intersection of creator monetization, decentralized finance, and blockchain payments — delivering real utility rather than speculative value alone.

- ▶ Creator monetization at scale
- ▶ Decentralized finance for all creator types
- ▶ Blockchain-native payment infrastructure
- ▶ Digital ownership for supporters
- ▶ Creator-focused utility infrastructure
- ▶ Community-first ecosystem design

09 Security & Infrastructure

Initial deployment planning prioritizes Base and Polygon blockchain infrastructure due to scalability and lower transaction costs. All core smart contracts will undergo third-party security auditing prior to mainnet deployment.

- ▶ERC-20 smart contracts on Base / Polygon
- ▶Staking contracts with time-locked vesting
- ▶Treasury management multi-sig
- ▶Liquidity provisioning on launch day
- ▶Third-party smart contract auditing
- ▶Multi-chain compatibility roadmap

Base (Coinbase L2)

Sub-cent gas, EVM compatible, primary chain

Polygon (MATIC)

Battle-tested, scalable, exchange-supported

10 Roadmap

PHASE 1 Foundation & Launch

- ▶ ICO launch across all stages
- ▶ Creator tipping expansion
- ▶ Wallet integration & onboarding
- ▶ Investor dashboard deployment

PHASE 2 Growth & Staking

- ▶ Staking contract deployment
- ▶ Creator onboarding programs
- ▶ Influencer & platform partnerships
- ▶ Ecosystem integrations

PHASE 3 Scaling & Governance

- ▶ Exchange listing expansion
- ▶ Ecosystem scaling infrastructure
- ▶ Governance protocol exploration
- ▶ Creator platform integrations

11 Disclaimer

Cryptocurrency investments involve substantial risk and market volatility. Nothing within this document constitutes financial advice, guarantees of future performance, or promises of financial returns.

Participants should conduct independent research and consult professional legal and financial advisors before participating in any blockchain-related investment or token offering. The \$TCM token is a utility token and should not be construed as a security or investment instrument.

△ Past performance of blockchain projects does not guarantee future results. All financial projections in this document are estimates only and subject to change.

12 2026 Security Protocol Stack

TipCryp implements layered 2026-grade Web3 security standards across wallet infrastructure, smart contract deployment, investor verification systems, and anti-phishing protection. Security architecture follows OWASP Top 10 2025 standards and zero-trust infrastructure principles.

Smart Contract Security

- ▶ OpenZeppelin audited standards
- ▶ Multi-signature treasury execution
- ▶ Upgradeable proxy architecture
- ▶ ReentrancyGuard on all external calls
- ▶ Timelocked admin operations

Website & Wallet Protection

- ▶ Content Security Policy v5 enforcement
- ▶ Anti-clickjacking headers
- ▶ Domain verification integrity checks
- ▶ Wallet phishing detection systems
- ▶ SHA-256 checksum verification

Certain metrics may include projected or beta-environment activity during early ecosystem rollout.

13 Treasury Strategy & Sustainability

The Community Treasury holds **150,000,000 \$TCM (19%)** of total supply. The table below shows how those 150M tokens are allocated internally across treasury functions.

BUYBACK LOGIC

0.1% of ecosystem tip volume allocated toward quarterly market buybacks and burns.

TREASURY MANAGEMENT

3-of-5 multisig wallet controls the 190M token Community Treasury pre-mainnet. On-chain DAO governance activates at mainnet launch — 10% quorum required, founders' vote capped at 15%.

LIQUIDITY STABILITY

Dedicated 150M token reserve allocated for DEX/CEX liquidity provisioning and volatility buffering.

TREASURY COMPONENT	% OF TREASURY	PURPOSE
Operational Reserve	35%	Infrastructure & scaling
Liquidity Management	30%	DEX/CEX depth stabilization
Strategic Growth	20%	Creator partnerships & onboarding
Security & Compliance	15%	Audits, monitoring & legal
